

Bi-County Landfill Clarksville, TN

Landfill Methane Outreach Program Conference and Project Expo
December 13-14, 2001

Enthusiastic Owner Seeking Project Developer

The Bi-County Landfill is composed of an open and closed waste footprint. This site currently has an active gas collection and control system (GCCS) installed in the closed waste footprint, but has not yet installed a GCCS in the area that is currently accepting waste. The closed portion of the site opened in 1974 and closed in 1991, while the new portion opened in 1991 and is scheduled to close in 2010.

Though the actual volume of waste in the closed portion of the landfill is unknown, the current waste-in-place for the new portion of the site is 1,000,000 tons. The total design capacity of the current waste footprint is 2.4 million tons.

Nearby potential energy end users include TEPAC and TVA. This environmentally-conscious landfill is interested in identifying a project developer to assist them in implementing a beneficial use project.

Landfill Specifications

Current Waste Footprint:

Waste in Place.....1,000,000 tons
Annual Acceptance Rate.....134,000 tons
Design Capacity.....2,400,000 tons

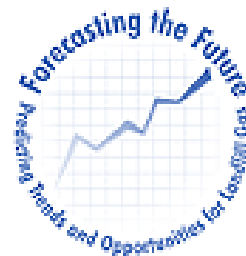

Landfill Information:

Bi-County Landfill
PO Box 1112
Clarksville, TN 37041-1112
